Preliminary Amendment

Please cancel claims 1-67 of the original application. Please add new claims 68-109.

68. A glazing bar comprising a main support member and a cap engaging member on an edge region of the main support member, the cap engaging member comprising a detent portion extending from said edge region back towards an opposite edge region of the main support member to engage a selected one of a plurality of corresponding detents on a cap to be engaged by the cap engaging member.
